SOUTH COUNTY HOSPITAL
ORTHOPEDICS CENTER

The physicians.
The procedures.
The place.

Individuals throughout southeastern New England have made the South County Hospital Orthopedics Center their choice for comprehensive orthopedic care. A partnership of South County Hospital, South County Orthopedics, and VNS Home Health Services, our Center is dedicated exclusively to delivering new levels of excellence in orthopedics.

As a patient, you are at the center of every phase of our care, ensuring that your experience is as smooth, coordinated, and seamless as possible. We looked at the full continuum of orthopedic care and designed our Orthopedics Center to reflect the latest best practices, from your first visit with your surgeon through your full recovery.

The Orthopedics Center's team of board-certified surgeons brings extensive experience to every procedure, as well as a record of superior outcomes. Registered nurses and caregivers with advanced training in orthopedics complement the physicians' expertise.

Our goal is to ease your pain and restore your mobility.

**The latest surgical techniques
and technological advances**

- First in Rhode Island to offer the innovative, FDA-approved Birmingham Hip Resurfacing™ System, providing an important alternative to a total hip replacement procedure
- First in Rhode Island to offer the Zimmer® Gender Solutions™ Knee, the first knee replacement designed expressly for women
- Innovative, nickel-free Oxinium™ implants, for patients with metal allergies
- Computer-assisted, image-guided total knee and hip replacement procedures, using VectorVision technology—a global positioning system for the body that ensures unprecedented accuracy, superior outcomes, and less postoperative pain

Better care by design

- Seamless, coordinated care from the doctor's office, to pre-surgery preparations, hospitalization, follow-up care planning and in-home care
- Highly respected, expert surgeons, nurses, and therapists committed to an optimal patient-centered experience
- In-patient care unit with private rooms, all with full bath and ample space for post-op physical and occupational therapy
- Comfortable family waiting and consultation rooms
- Extra-wide hallways to facilitate ambulation therapy
- Patient and family education center with Internet access
- Electronic medical records access for staff

Comprehensive orthopedic services

- Complete range of state-of-the-art care for joint replacement, fracture, or osteoarthritis
- Total replacement of all major joints
- Hip resurfacing
- Sports medicine
- Carpal tunnel procedures
- Tendon and ligament care
- Arthroscopic procedures on all major joints and for muscle, tendon, nerve, and cartilage damage
- Advanced neuro-spinal care for degenerative spine disorders or injury of the neck or spine
- Comprehensive physical and occupational therapy
- Pre-operative education classes
- Pre- and post-surgery home care available through VNS Home Health Services
